CAREER ASPIRATION

Aspiring Software Engineer with a specialized focus on AI, ML and robust full-stack web development skills. Proven ability to integrate Agile Methodologies into development workflows. Committed to delivering scalable technical solutions and driving innovation within dynamic, forward-thinking IT teams.

EDUCATION

Integrated Master of Computer Applications (5 years Program) **2022 - 2027**
Amrita Vishwa Vidyapeetham
- Current CGPA: 8.92

Higher Secondary, Main stream Business/Accounting/Commerce (2022)
The Choice School (Central Board of Secondary Education)
- Aggregate Marks- 92.3%

Secondary School (2020)
The Choice School (Central Board of Secondary Education)
- Aggregate Marks - 88.9%

INTERNSHIP

Company: Infosys Springboard **2025**
- Completed a one-month internship working in a team-based environment
- Contributed to the development of an Automatic Number Plate Recognition (ANPR) system
- Assisted in building Automated Traffic Control and Classification (ATCC) solutions
- Gained hands-on experience in real-world problem solving and collaborative development

Company: G10X **2025**
- Collaborated with a project team to design and implement a Retrieval-Augmented Generation (RAG) system
- Applied knowledge distillation techniques to fine-tune a smaller student model using a large LLM (teacher)
- Improved information retrieval accuracy and system performance

PROJECT

Project 1: Theeram Backwaters Venue Booking & Management System (Client Project) **2026**
- Aim: To design and deploy a full-stack web application for efficient venue booking, event management, and real-time pricing automation for a commercial client.
- Tools and Technologies: React.js, PHP, MySQL, HTML, CSS
- Functionalities: Dynamic booking system with conflict detection, real-time availability, automated pricing (GST & add-ons), payment tracking, capacity validation, and receipt generation; ensured secure data handling and optimized responsive UI.
- Duration: 2 months and Type: Individual Client Project

Project 2: AIzheimer's Disease Prediction using AI With Personalized Treatment Recommendation System **2025**

- Aim: To predict AIzheimer's Disease early using CNN and DNN models trained on MRI scan data.
- Tools and Technologies: Python, DJango, Sqlite3, HTML, CSS and Javascript.
- Functionalities: MRI scan–based disease prediction using CNNs and DNNs, online appointment booking, early-stage diagnosis support, and personalized treatment recommendations.
- Duration: 4 months
- Team Size: 6 Members

Project 3: Community Service System **2024**

- Aim: To design and develop a web-based platform for reporting, tracking, and resolving community issues related to police, electricity, and water services.
- Tools and Technologies: MySQL, HTML, CSS, JavaScript and PHPMyAdmin.
- Functionalities: User issue reporting, public issue visibility, automated notifications, authority-side issue management, and user feedback system for resolution tracking.
- Duration: 4 months
- Team size: 3 Members

INTERPERSONAL ATTRIBUTES

Effective Communicator | Excellent Team player | Good in Time Management | Good in Critical Thinking and problem-Solving | Flexible & Adaptable | Possess Leadership qualities
